

Accelerate contract review and analysis

Automatically extract and summarize any provision from any contract. Uncover insights faster and more accurately than by conventional methods. Trusted on over USD \$70 billion in transactions to date.

Intralinks®, the global leader in transactional technology services, has partnered with Kira to offer our clients Diligence Engine – a tool that greatly expedites document review and the abstract creation process.

Lawyers mitigate deal risk and expedite contract review with Diligence Engine:

- Review contracts and create summaries in minutes to seconds.
- Analyze large numbers of contracts rapidly. No need to normalize risk of unreviewed contracts.
- Automatically generate contract summary chart that maps key provisions across all documents.

Document	Title	Date	Term	Parties	Force Majeure	Limitation of Liability	Indemnity	Assignment	Change

MedSafe Supply and Distribution.pdf	1	1	1	1	2	1	1	1	

How It Works:

Diligence Engine is a technology-enhanced contract review and analysis system. It has several integrated components, and the entire review process takes only seconds per page.

Users can add documents to the system with just a few clicks.

A wide variety of file types are supported and automatically converted to machine-readable text.

Kira's software uses highly accurate machine-learning models to identify and extract provision text.

Extracted provision text and analysis can be viewed in summary charts on screen or exported.
